

Mýrdalshreppur

Proposal on health services in Vík

The ESC proposes to the Health Care Institution of South Iceland (HSU) that a foreign speaking doctor be appointed to the clinic in Vík. The ratio of foreign residents is nowhere in Iceland higher than in Mýrdalshreppur. This could therefore increase the living standards of a very large part of the community.

The ESC furthermore proposes to the local council of Mýrdalshreppur that it support the proposal by temporarily guaranteeing a rental apartment for an additional doctor in Vík.
